# Sinalco Board Game

This board game is the ideal activity for in-between or a fun evening with your family and friends (2 - 4 players). Lead one of your gaming pieces through the bubble stream and reach the Sinalco logo before the others do.

---

## Preparation

Download the PDF, print the board, get a dice and two playing pieces for each player. Playing pieces can be anything you have at hand, for example Sinalco crown caps.

---

## Rules

1. Each player controls two playing pieces and places them in his base, one of the Sinalco bottles. The players take turns in clockwise order, starting with Player 1. The players roll the dice once, when it is their turn and may move one of their playing pieces according to their die roll. The die roll result cannot be split among the playing pieces, which means that you have to decide and can only move one piece per turn. The start bubble counts as a normal bubble.
2. When a player moves his playing piece onto a bubble which is already occupied by another player, the first playing piece is removed and has to return to the base. There can never be two playing pieces on the same bubble.
3. Every time a playing piece lands on a special field, the player has to move his playing piece forward or backward, according the number on the field, for example -3 means, 'move three bubbles backward'.
4. Winner - The player who manages to reach the Sinalco logo in the middle first, wins the game. Only one playing piece has to reach the logo.

**Have fun playing the game :)**
